

Fruits

How to get more:

Choose fruit as a snack. Add fruit to yogurt or cereal at breakfast. Have fruit in place of dessert!

Eating fruit as part of a healthy diet can:

- Lower chronic disease risk and cholesterol
- Support healthy digestion
- Aid healing
- Promote healthy teeth and gums
- Keep you feeling full longer

Reasons to include fruit:

- Low in fat, sodium, calories and no cholesterol
- High in potassium, fiber, Vitamin C and folate (a B vitamin).
- Easy to grab and tastes great too

What kind?

All forms of fruits count—fresh, frozen or canned. Be sure to include a colorful variety.

How much?

Most people need about 1-2 cups of fruit per day.
